Important Information for the post of Transport Expert.

Qualifications and Experience

- Maximum age at the time of application should be 40 years.
- A graduate in Transport Planning, Urban Transport Systems, Transport Management or in any other course in transport sector.
- **At least 5 years of experience** in public bus operations, with **3 years** in an urban public transport environment.
- Deep knowledge of urban transport systems and a proven ability to keep services running smoothly.
- Confidence in using tools like Excel, Power BI, or Tableau to turn data into stories.

Skills & Knowledge

- Solid understanding of BRTS/city bus operations, especially in electric/CNG bus deployment.
- Familiarity with depot management, energy infrastructure, and vehicle-charging system interfaces.
- Proven ability to work collaboratively with diverse teams and external stakeholders.
- Analytical mindset to connect data insights with operational and infrastructure planning.
- Must have deep understanding of multi model transport integration.

Daily Operations Oversight

- Manage day-to-day fleet deployment, driver assignments, and adherence to schedules.
- Coordinate with our Central Control Centre to ensure seamless, safe and reliable operations.
- Troubleshoot operational disruptions swiftly and ensure a positive passenger experience.

Infrastructure Readiness & Optimization

- Assess and monitor the operational readiness of depots, charging stations, and route infrastructure to support bus performance.
- Plan and oversee upgrades or minor expansions of transport infrastructure (e.g., new chargers, depot layout adjustments) in alignment with operational needs.
- Work with civil and electrical engineering teams to ensure infrastructure improvements meet operational standards and support long-term service goals.

- Lead AMTS/BRTS Infrastructure development projects in swift manner in Multi Stakeholder environment.
- Collaborate across departments to ensure transport infrastructure and operations evolve with city needs and emerging technologies.
- Identify gaps in service or infrastructure and propose solutions to enhance safety, sustainability, and passenger comfort.
- Prepare periodic reports and data-backed insights on operational performance and infrastructure status for AMTS/BRTS management.

Transport Data Specialist

- Analyse the fleet's data; everything from kilometres driven to energy efficiency and find ways for optimisation.
- Develop easy-to-read dashboards that highlight key insights for AMTS/BRTS management.
- Look for patterns in delays, energy use, and performance; then propose practical solutions.
- Prepare monthly reports that help us stay accountable and transparent.
- Carry out route analysis based on O.D. data, passenger demand, revenue model and advice on the same and appropriate scheduling.

E-Bus Technology and Charging Infrastructure Specialist

- Oversee the electric bus fleet: the propulsion systems, batteries, and cooling systems.
- Ensure that our buses meet safety, energy, and operational standards at all times.
- Work with manufacturers to resolve technical issues and keep our e-buses running.
- Monitor depot charging infrastructure to guarantee uptime and safe operations.

Digital Systems Expert

- Make sure GPS, CCTV, PIS, and other ITS components are always working and talking to each other.
- Troubleshoot and fix any integration issues quickly to keep real-time data flowing to our control centre.
- Work with vendors to upgrade and expand our digital systems as technology evolves.
- Develop protocols for data security and real-time monitoring; because passenger safety comes first.
- Share best practices with our team to ensure everyone's up to speed on using these systems.
